

Gerry

11/11/60

Dear Gene,

Thanks for your note of the 18th and enclosed check repaying me for the X boxing. I have begun the effort to get the unprinted testimony and I do expect to get it. I'll write soon.

If you do not have the other "Bradley" report, if you have the identification I can get it.

Perhaps you may forgotten, or you make no reference to it, but you were also going to send me the data on the minuteman types. That I would like to see.

For what it is or is not worth to you, do not believe Roger is either an evil man or a man intending evil. I think his mind may be that way, that he may really, since sly, believe all of that, in my, in fact, have been induced to believe it by the ways in which he was questioned by others. I hardly know him, so I cannot and do not pretend to be certain or to have a deep understanding. If my evnt, even without the annotations, you should now be in a position to prove that didn't happen, and if it becomes necessary, it is possible I can add to this. From what we discussed, I do not anticipate the need, and I do not advise the time to pursue it at this need.

You said you were not going to pursue cases against the San Diego people and Penn, for the persons we discussed. If you have filed actions against either or both, I hope you will take the necessary steps to withdraw them. They are at best utilities on which you will waste money, meanwhile, when you do this, you will lessen my position in that of others who might be inclined to help you. I certainly think you should before trying to see Garrison again. Let me bring you up to date on him (as of yesterday). He is kept in the hospital for at least three weeks of traction. The treatment he had to interrupt during the campaign was a waste of time because it was so brief. After this treatment is completed, it will then be determined whether the disc requires surgery. At the office seems to be crowded under, as I suppose he also is, by the normal accumulations of the campaign. I'll know when it may be possible for him to find time and I'll let you know. Doing before than will merely cast you in the role of a persistent nuisance to those who do not know.

Sincerely,

Harold Weisberg
